Career Path	Job changing has stigma	Job changing put you behind	Job changing is necessary	Job changing doesn't need to be in a straight line	
Career Development	Not really an option for the Traditionalists. Just taught to keep their nose to the grindstone. The ultimate goal was simply to move up within the organization, but realized this happened only to a few.	Focus on developing their careers through opportunities within one organization or at least one industry. Moved up based on seniority, not always based on skill and expertise.	Take a pro-active approach to career development through more degrees and experiences both within the organization and without. This is often seen as being dis-loyal to the company, but Gen Xers see it as being loyal to themselves.	Millennials will enter the work force with more experiences than any generation before them. They will continue to seek this through requests for more experiences and opportunities. If they don't get it at their work, they will seek it elsewhere.

Training and Development	Training should contribute to the organization's goals -Training Focus: Traditional, On-the-job, Top-down	Training is a contribution to the organization's goals, but is also a path to promotion and additional compensation. Training Focus: Technical, Data, Evidence	Training enhances their versatility in the marketplace and investment in their future. Not necessarily loyal to the company who trained them. Training Focus: Practical, Case Studies, Applications	Willing and eager to take risks; don't mind making mistakes-they consider this a learning opportunity. -Prefer webinars and online technology to traditional lecture-based presentations. Training Focus: Emotional, Stories, participative	-Student-centric, Kinesthetic, Multi-modal, eLearning, Interactive, Lounge Room Style, Multi-stimulus -Pair them with mentors who can train them and introduce them -Pre-scheduled and pre-planned learning activities (Ex: training or lectures) are less effective with this generation. They are much more likely to engage in ad hoc and on-demand learning and development activities, enabled by technology, that are relevant and related to the individual at the moment. Bring a whole new meaning to "just in time learning" -Highly "mobile" thus they will demand learning and development opportunities that support their free and nomadic nature. -They will rely on their network of relationships to help them facilitate their own professional learning and development and help them navigate through the corporate world.
